

Title: Synthetic Catalysis Note 002

Notice: This is synthetic demo content only. It is not a real paper and does not contain real experimental re

A second fictitious reaction used Catalyst B with Feedstock B.

The reaction temperature was 420 C and the reaction pressure was 2 MPa.

The reported conversion was 78 percent and the selectivity to Product B was 88 percent.

This synthetic example is designed for workflow demonstration and manual verification practice.
